

Memphis, Tennessee • March 5-6, 2010

Course Summary

Listening plays a vital role in the sensory integration process. In fact, some believe that the auditory system is the 'missing link' in sensory integration modalities. Both research* and clinical experience have shown that using sound-based interventions for clients with sensory processing difficulties can increase treatment effectiveness.

In this two-day workshop, you will learn to use Therapeutic Listening® Modulated CDs to create individualized, home-based programs for clients. You will also learn how to implement Therapeutic Listening strategies in conjunction with postural, respiratory, and sensory activities. The course will take you through all of the steps--from assessment to outcomes--for creating complete Therapeutic Listening programs. Video case presentations will be used to illustrate points and show changes in individuals with listening and other sensory processing difficulties.

This workshop will be especially meaningful for practitioners who have a background in sensory integration, including therapists in schools, hospitals, and private clinics. This course provides 12 contact hours or 1.2 AOTA CEUs, and provides participants with the necessary background information to begin using Therapeutic Listening right away. Specialized headphones and CDs are necessary and are available for purchase upon completing the course.

*Hall, L. & Case-Smith, J. (2007). The effect of sound-based intervention on children with sensory processing disorders and visual-motor delays. American Journal of Occupational Therapy, 61(2), 209-215.

Who Can Benefit From Therapeutic Listening?

Therapeutic Listening, coupled with sensory integrative treatment, tends to speed the emergence of:

- Attention
- Organized behavior
- Self regulation
- Postural control
- Bilateral coordination
- Praxis
- Fine motor control
- Oral motor/articulation
- Social skills/communication
- Visual motor integration

Course Objectives

Upon completion, participants will be able to:

- Describe the relationship between listening and sensory integration.
- Identify individuals with sensory processing and listening difficulties who may respond well to Therapeutic Listening.
- Create Therapeutic Listening programs that are adapted to meet specific needs of individual clients.
- Demonstrate understanding of the role of postural, respiratory, and sensory strategies that are part of the Therapeutic Listening program.

"The results you said you were getting at the Listening With the Whole Body workshop seemed incredible, but I am getting close to 100% success rate with using this in speeding up goal attainment. And yes, it works for toilet training! I've been in practice since 1987, and this is just about the easiest to administer and most effective tool for sensory integration-based disorders I have used to date! Thank you for improving the lives of countless children and families!" --Margaret Fischer, OT

Instructor

Lynette Burke, OTR completed her training in Occupational Therapy in 1984, after graduating with a degree in Psychology and Child Development in 1981. Since 1984 she has practiced in a variety of pediatric settings including early intervention programs, private schools and private practice. She has extensive experience in sensory integration and is SIPT certified. She is also certified in auditory interventions including Therapeutic Listening, Samonas, Interactive Metronome, and Listening Fitness Trainer Programs with Paul Madaule. Lynette is co-owner of Advanced Pediatric Therapies, a private pediatric practice in Portland, Oregon.

Therapeutic Listening[®]

Listening With the Whole Body

Memphis, Tennessee • March 5-6, 2010

March 5

- 8:00 Check-in begins
- 8:30 What is listening?
- 10:00 Break
- 10:15 What is Therapeutic Listening[®]?
- 11:00 Listening as a sensory integration process
- 12:00 Lunch (on your own) / Listening lab
- 1:15 Using sound as a tool
- 2:15 Understanding the elements of music as clinical tools
- 3:00 Break
- 3:15 CD descriptions & clinical use of Therapeutic Listening CDs
- 4:30 End

March 6

- 8:30 Programming with Therapeutic Listening[®]
- 9:30 Anatomical structures and neurological considerations
- 10:30 Break
- 10:45 Anatomy and neurology (continued)
- 12:00 Lunch (on your own) / Listening lab
- 1:15 Core activation and development
- 2:00 Assessment tools
- 3:00 Break
- 3:15 Clinical case studies, problem solving, questions
- 4:30 End
